

POSTDOCTORAL PROGRAM Spring 2014

Genethon is launching an **International Postdoctoral Program** to attract excellent scientists who wish to pursue their career in the field of gene therapy. Postdoctoral research positions are available for a period of **three years**.

Genethon is a non-profit organization hosting over 200 scientists, with excellent facilities for research, development and manufacturing of gene therapy products. Its main mission is the discovery and clinical development of novel strategies for gene therapy of rare diseases. Genethon's teams are working on neuromuscular, hematopoietic, liver and skin disorders, on basic mechanisms of virus-host interaction, and on the development of new vector technology (http://www.genethon.fr/en/).

Genethon is located within the Genopole of Evry, France's leading biotechnology and biotherapy science park in the southern outskirts of Paris.

Eligibility

Applicants who have less than three years of post-doctoral experience are eligible. The ideal candidate has a strong interest in translational research in the field of genetic diseases, a solid background in cell and molecular biology, a good publication record and excellent references. Previous experience with viral vectors and/or animal models of disease is a plus. Candidates should be creative and capable of developing a competitive research project while working in autonomy under the supervision of a team leader. Excellent communication skills in the English language is a mandatory requirement.

Application

Applicants should send by e-mail the following documents, <u>as a single PDF file</u>, to: <u>postdoctoral-program@genethon.fr</u>:

- Cover letter, including a motivation statement (1 page)
- > Detailed CV, including a summary of the candidate's research experience
- > List of publications and communications
- ➤ List of 2-3 persons qualified to provide a recommendation letter

Selection

A pre-selection will be carried out in the month of June. Shortlisted candidates will be asked to come to Genethon for an interview in the month of September. Successful candidates are expected to start January 2015.

The deadline for applications is May 31st, 2014
